

What ICE is all about

ICE is a working party of Iden Parish Council. We are here to ensure that, in the event of a water/electricity supply failure, or another emergency, we can react to ensure that people are safe, emergency services called if needed or authorities are on hand to deal with the situation. We can inform residents of the situation through our wardens as soon as we know about it. Our wardens can give help where needed.

A new ICE committee have recently taken over after Jim and Gill Wood left the village, we thank them for their sterling work in setting this up.

We are currently working on

1. Processes that need to be put in place in a time of emergency.
2. How best to communicate to the village.
3. Update our knowledge of which people in the village need extra help at certain times. (September a survey will be circulated)

We would like to thank all the Wardens for their continued support, thank you to all the residents also for their support during this time of establishing processes.
